

Servicing Chicago, Milwaukee, Madison and the greater Midwest, Devine180 is a manufacturers rep firm focused on the security and life safety industry. Our organization is a full service sales and marketing agency who adds value to the sales process while amplifying the global marketing efforts of our manufacturing partners. Our group carries a portfolio of synergetic products which require a high level of technical and product knowledge. We spends almost 100% of our time face-to-face with customers, engaged in either sales or operational activities.

We look forward to the opportunity to server you!

Critical Power Solutions

Xtreme Power designs, engineers, and services UPS systems ranging from 350VA to 60kVA available in standby, line interactive, online, and isolated online topologies. Power distribution units ranging from basic, to smart, to configurable power distribution, our power distribution solutions meet the needs of virtually any application. Designing and choosing the right product for your application is easy with Xtreme's online UPS selector tool.

- UPS System from 350VA to 60kVA
- Amazing Prices
- Better Customer Service
- Powerful Charger for Extended Runtimes
- Three Year Warranty

High Performance Illuminators For Video Security Applications

Raytec LED illuminators are designed to help any video surveillance system deliver the very best performance at night.

VARIO2 IP i16 & w16 illuminators; our most powerful IP illuminators ever. The new products combine the power and distance of our largest illuminators, with the smart network capability.

Controlling illuminators individually or in groups, users can create dynamic lighting systems to deliver the perfect level of light.

A Wireless Lockset Revolution

Proxess manufactures multiple solutions to fit your locking needs. Choosing intelligent locking systems to replace standard mechanical locksets is an affordable access control solution including audit trails, time schedules and remote rekey. By adding Network-On-Card solution, off-line locks can be updated automatically without the need of on-site system administration to make changes. Proxess' unique BLE hub network allow virtual on-line communication on-demand enabling system lockdown and other unique features.

SONY Video Security

Sony's New SNC-EMX Series Include 5MP

The EMX Series was introduced by Sony just weeks ago at ISC-West. Included in the EMX Series cameras are three new 5MP IP network cameras. The EMX Series cameras include; EVA advanced analytics and H.264 & H.265 smart codecs. high-quality automatic varifocal lens provides 3–10-mm focal length. Wide dynamic range technology ensures evenly exposed video footage, even in harshly lit high-contrast scenes where ordinary cameras struggle to accommodate bright highlights and dark shadow detail. Store up to 2 TB of local alarm recording on an optional microSD card.

ICT

One Unified Solution for Access Control

Protege WX is an out-of-the-box, all-in-one system that is quick to set up and intuitive to use. Simply unpack the box, connect the controller and power supply, launch your web browser. The wizard-driven interface guides you through the process to configure your system, giving you a cost effective fully functional access control and intrusion detection solution. The modular hardware design allows you to scale your system as your requirements change. Start with the controller or choose one of the cost-effective starter kits, then add optional accessories as and when you need them.

Frictionless Facial Authentication

StoneLock GO delivers a trusted frictionless & revolutionary approach to secure facial authentication. Providing scalability, versatility, extended capture range and speed. Support up to 20,000 face-only users. Next generation technology brings confidence to securing the enterprise in a credential free environment. The new stylish GO product supports simultaneous multi-face and body tracking. Facial recognition up to 54" away from the device and up to 130° in both vertical and horizontal directions makes this solution fully ADA compliant.

Genesis LED EG1 Series Notification Devices

Genesis LED EG1 Series horns and LED strobes feature a sleek low profile design and energy-efficient technology that makes them less expensive to install and operate by reducing overhead. High performance LEDs require fewer circuits and power supplies. These new appliances are designed with energy-efficiency and life safety in mind. Field-configurable sound output levels provide the flexibility modern life safety projects demand, while the Genesis LED control protocol keeps multiple strobes on compatible NAC circuits synchronized to well within NFPA 72 requirements.

The Guardian - Shooter Detection System

Incorporating the world's finest acoustic gunshot identification software with infrared gunfire flash detection to produce the highest performing, fully automatic, and most accurate gunshot detection technology available today with ZERO false alerts when every second counts. SDS has partnered with most of the industries leading manufacturers of VMS, Access Control and Mass Notification technologies to offer a direct integration. The Guardian System is certified by US and UK Government authorities and trusted by our customers across the globe.

Hardened Industrial Network Switches

The reliability of advanced IP-based networks and products have allowed the security industry to take advantage of innovations to dramatically improve capabilities and flexibility. However, reaping these benefits requires the deployment of networking equipment in challenging environmental conditions. Equipment used in remote industrial applications must be designed with power supplies that work reliably and must protect against power spikes and poor-quality power. The WPR series has been specifically designed to overcome complications and limitations associated with industrial IT and hardened networking solutions.

New NFDCloud For Enterprise

Rasient's patent-pending NFDCloud is a reliable vms-agnostic, open-platform cloud video surveillance system suited for mutli-branch enterprises with surveillance cameras in each branch. NFDLink enables the use of commonly available broadband or wireless services to send video recordings in a VMS-agnostic system supporting all available VMS. Get significantly lower purchase, CAPEX and OPEX costs through storage consolidation for NVR/DVRs. Get unmatched reliability and performance with video class hard drives designed for the intense demands of surveillance.

NFDLink GUI

Qognify

Ocularis 5.7 Video Management System

Ocularis is a scalable video management solution which can be utilized in small single site locations or deployed in large demanding multi-site enterprise applications. Ocularis is the most user-friendly open architecture VMS. Response times means everything. Ocularis improves site-to-site capabilities and communications with powerful features like push video feeds to remote displays and advanced centralized management.
